**FIRST expedition over the 7-Seas to the 7-Summits
by nature's power
to connect kids with sports & the environment!**

FROM TOP TO TOP

The first 7-summits non-stop round-the-world expedition connects the 7 continents with their various climate zones. As a continuous challenge we will climb the highest mountain in every continent, including Mount Vinson in Antarctica. The expedition's exclusive use of human power and nature's force (wind, solar) proves that even today great achievements can be made in balance with nature.

Sabine & Dario Schwörer

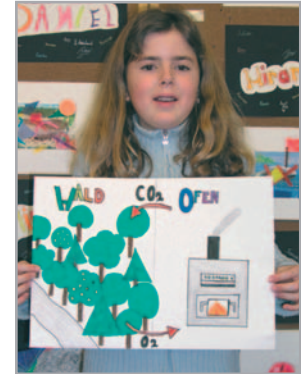

The young Swiss couple Sabine and Dario will attempt to do it non-stop. Along the expedition we aim to minimise our «ecological footprint». For example, we collect at least the same amount of waste on our weekly cleaning actions as we produce.

«During the expedition we will cover a total of 50'000 nautical miles sailing, 15'000 kilometers cycling and a total of 230'000 altimeters climbing.»

FROM SCHOOL TO SCHOOL

School visits are made by crew members at each destination. We teach children passionately about the importance of nature and give them fun projects to learn all about sustainability. Then the children express their own ideas about how we can care more for our environment and climate through painting and drawing.

Already 10'000 kids visited!

Act now!

You can support this ambitious initiative:

- get your exclusive TOPtoTOP T-shirt!
- join the expedition!
- become a member!
- add your own solutions to our website!
